Health Literacy

FREE ONLINE COURSE

60% of the population is not health literate!

Improve your patients' health outcomes by enhancing their health literacy.

Presenting a new **online accredited course** that introduces you to the concept of health literacy. It will give an overview of current knowledge about the links between literacy and health outcomes. The goal is to help you understand how health literacy affects your own practice or work setting. Within the course are some practical tools and strategies to identify and address the health literacy needs of your patients/clients and the barriers that you may inadvertently create to patient/client understanding.

Take this course today @ cma.ca/healthliteracy

Available in English only at this time.
