Combatting Lyme disease myths and the “chronic Lyme industry”

A News story on Lyme disease mistakenly identified the Association of Medical Microbiology and Infectious Disease (AMMI) as a partner of the Centre for Effective Practice in developing clinician toolkits covering various stages of the disease.¹ In fact, the president of AMMI is a member of a working group involved in the development of the toolkits, and the toolkits cover early Lyme disease.

CMAJ regrets the errors, which have been corrected at cmaj.ca.
