

**Appendix 7 (as supplied by the authors): Fixed-effects models comparing caloric sweetener supply in Canada with Australia and the United Kingdom**

|                        | <b>Coefficient</b> | <b>95 % Confidence Interval</b> |
|------------------------|--------------------|---------------------------------|
| NAFTA                  | 34.39              | 30.2 to 38.76                   |
| GDP per Capita         | 85.81              | -239.18 to 410.82               |
| Urbanisation           | 9.82               | 0.50 to 19.14                   |
| Post-1994*             | -5.33              | -21.52 to 10.85                 |
| Australia <sup>+</sup> | -222.53            | -385.44 to -59.63               |
| UK <sup>+</sup>        | 100.78             | -14.25 to 215. 81               |
| <i>Country-years</i>   | 48                 |                                 |
| <i>R<sup>2</sup></i>   | 0.78               |                                 |

*Notes:* \* Pre-1994 is the reference group. <sup>+</sup>Canada is the reference. Models estimated with controls for linear time-trends (not shown) and standard errors clustered at the country level to adjust for non-independence of repeated country observations.
