

Appendix 4 (as supplied by the authors): Average annual number of unique medications (based on ATC categories) between 2003 and 2015 in British Columbia, by year of birth. We found no significant discontinuity at the change in the public drug plan deductible at 1939 (estimate 0.06, 95%CI: -0.04 to 0.16, relative increase of 1.87%).
