

**Appendix 4 (as supplied by the authors):** Figure S3. Temporal trends in obstetric anal sphincter injury stratified by parity, obstetric history and episiotomy among nulliparous women (panel A), among parous women without a previous cesarean delivery (panel B), and among women with a vaginal birth after cesarean (panel C) among singleton term deliveries, Canada, 2004-2014. VBAC denotes vaginal birth after cesarean (VBAC); SVD denotes spontaneous vaginal delivery; CD denotes cesarean delivery.
