Family medicine

Family physicians often work with little or no back-up, so it can be hard for them to get the second opinion they need or the kudos they so richly deserve. Now, their troubles are over. The patented Consult 2000™ can help alleviate the stress your loved one faces because of a shortage of specialty support. This device resembles a handsome novelty eight ball and it offers such helpful and insightful comments as: "Go with you gut!", "Great job, Doc!", "Remember not to overmedicate!" and "You made the right choice!". Order before Dec. 1 and have an extra personal message, "You are on fire today!", added at no extra charge. Just \$199.99.

Radiology

With the development of digital technology in radiology, radiologists don't even have to be in the hospital to do their job — the pictures can be emailed right to the lounge chair in their backyard. Now, our creative team has come up with a fun line of beachwear and accessories for the sun-loving imaging expert. Choose from stylish shorts and Hawaiian print shirts in a wide array of colours. And to ensure that the relaxing radiologist is not disturbed, every order over \$50 comes with a fun "Radiologist At Work" sign! Shirts and shorts, \$24.99 each.
