

## CORRECTION

### ***Mycobacterium avium* complex infection presenting as persistent ascites**

CMAJ has been made aware of an error that occurred in the Apr. 3, 2018, issue.<sup>1</sup>

In the first paragraph on the fourth page, the third sentence read, “Likewise, clarithromycin is a much more potent inhibitor of CYP250 3A4 than azithromycin.” This should have read, “Likewise, clarithromycin is a much more potent inhibitor of CYP450 3A4 than azithromycin.”

This has been corrected at [cmaj.ca](http://cmaj.ca).
