Disinfection of N95 respirators

I thank Daeschler and colleagues for looking into the important subject of whether N95 respirators can be disinfected and reused.¹ The authors don't mention any application to the domestic scene. I have a few N95 masks left over from the last time the air quality here in British Columbia necessitated wearing one. After use now for prevention of coronavirus disease 2019, can I reuse these masks by putting them in the kitchen oven at 70 C° for an hour and at ambient humidity?

Gerard D. Ponsford MBBS

Orthopedic surgeon (retired), White Rock, BC
