

Appendix 1: Example of a clinical sensibility testing tool

The investigators (names of investigators) request your assistance in assessing the clinical sensibility of the questionnaire (name of questionnaire) by answering the following questions:

1. To what extent are the questions directed at important issues pertaining to (*specify intervention*) in (*specify population*)?
(Please circle your response).

2. Are there important issues pertaining to your use of (*specify intervention*) that should be included in the questionnaire which have been omitted?
(Please circle your response).

Please identify any omissions: _____

3. To what extent are the response options provided simple and easily understood?
(Please circle your response).

4. To what extent are questions likely to elicit information pertaining to your use of and experience with (*specify intervention*) in (*specify population*)?
(Please circle your response).

5. How many items are inappropriate or redundant?
(Please circle your response).

Please identify redundant or inappropriate items: _____

6. How likely is the questionnaire to elicit (*specify your objective*) in (*specify population*)?
(Please circle your response).

7. How long did it take you to complete the questionnaire? _____ minutes

Please feel free to provide any other feedback on the back of this form.

Thank you for assisting us with the sensibility testing of our questionnaire!
