

**Appendix 1 (as submitted by the authors): Supplementary Figure 1: Heart rhythm abnormalities in COVID-19 patients.**

Panel A: A representative ECG of prolonged QTc (509ms) in a patient treated with QT-prolonging drugs (arbidol and moxifloxacin). Later this patient died of Torsade de Pointes and VF.

Panel B: A representative ECG with normal QTc (389ms) in a patient treated without QT-prolonging drugs.

## Supplementary Figure 1
